YOUR BEST
SOLUTION**

OSC

TOP
SOLUTIONS
GROUP

AT OSC WE CONNECT THE NEEDS AND
OPPORTUNITIES OF OUR CLIENTS
WITH AGILE, FLEXIBLE AND RELIABLE
SOLUTIONS TO OPTIMIZE YOUR
PROCESSES.

We are an **integrator**
technological with presence
in 16 countries.

Today we have a team of more than **1000 collaborators** to develop technological solutions, as a **regional ally of operators, sellers and service providers** supporting them in the consolidation of strategies and optimization of processes, generating value and competitiveness.

We have an experience in
the market of more than

28 years

Workforce management

WF

What do we do?

We effectively manage **human talent** requirements and **associated support services** for our clients in leading **IT and Telecom** companies, as well as other industry sectors.

Headhunting:

We have a specialized recruiting team dedicated to finding talent that matches our clients' needs.

Coordination of services

We manage the operational process by providing tools and resources to address business challenges and mitigate risks.

Consulting:

We support the process of hiring specialized consultants to meet the demand of associated projects.

Administration of expenses:

Our expense control model manages and oversees financial resources in line with industry needs.

Business Process Outsourcing

BPO

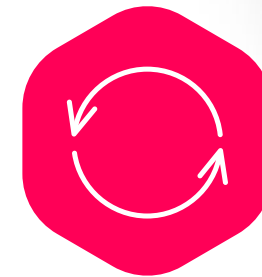

We possess extensive **knowledge of our clients' processes** across various productive sectors and have **successfully optimized and enhanced the value chain** through the development of highly innovative and flexible solutions.

- **E2E Management**
- **Operation and Site Access Management**
- **HSEQ - Expense Management**
- **BPO Digital SW Documentary**

BPO Solutions

- Contact Center as a Service
- Site Access Management
- Expense Replenishment Management
- NOC Help Desk
- Software Factory

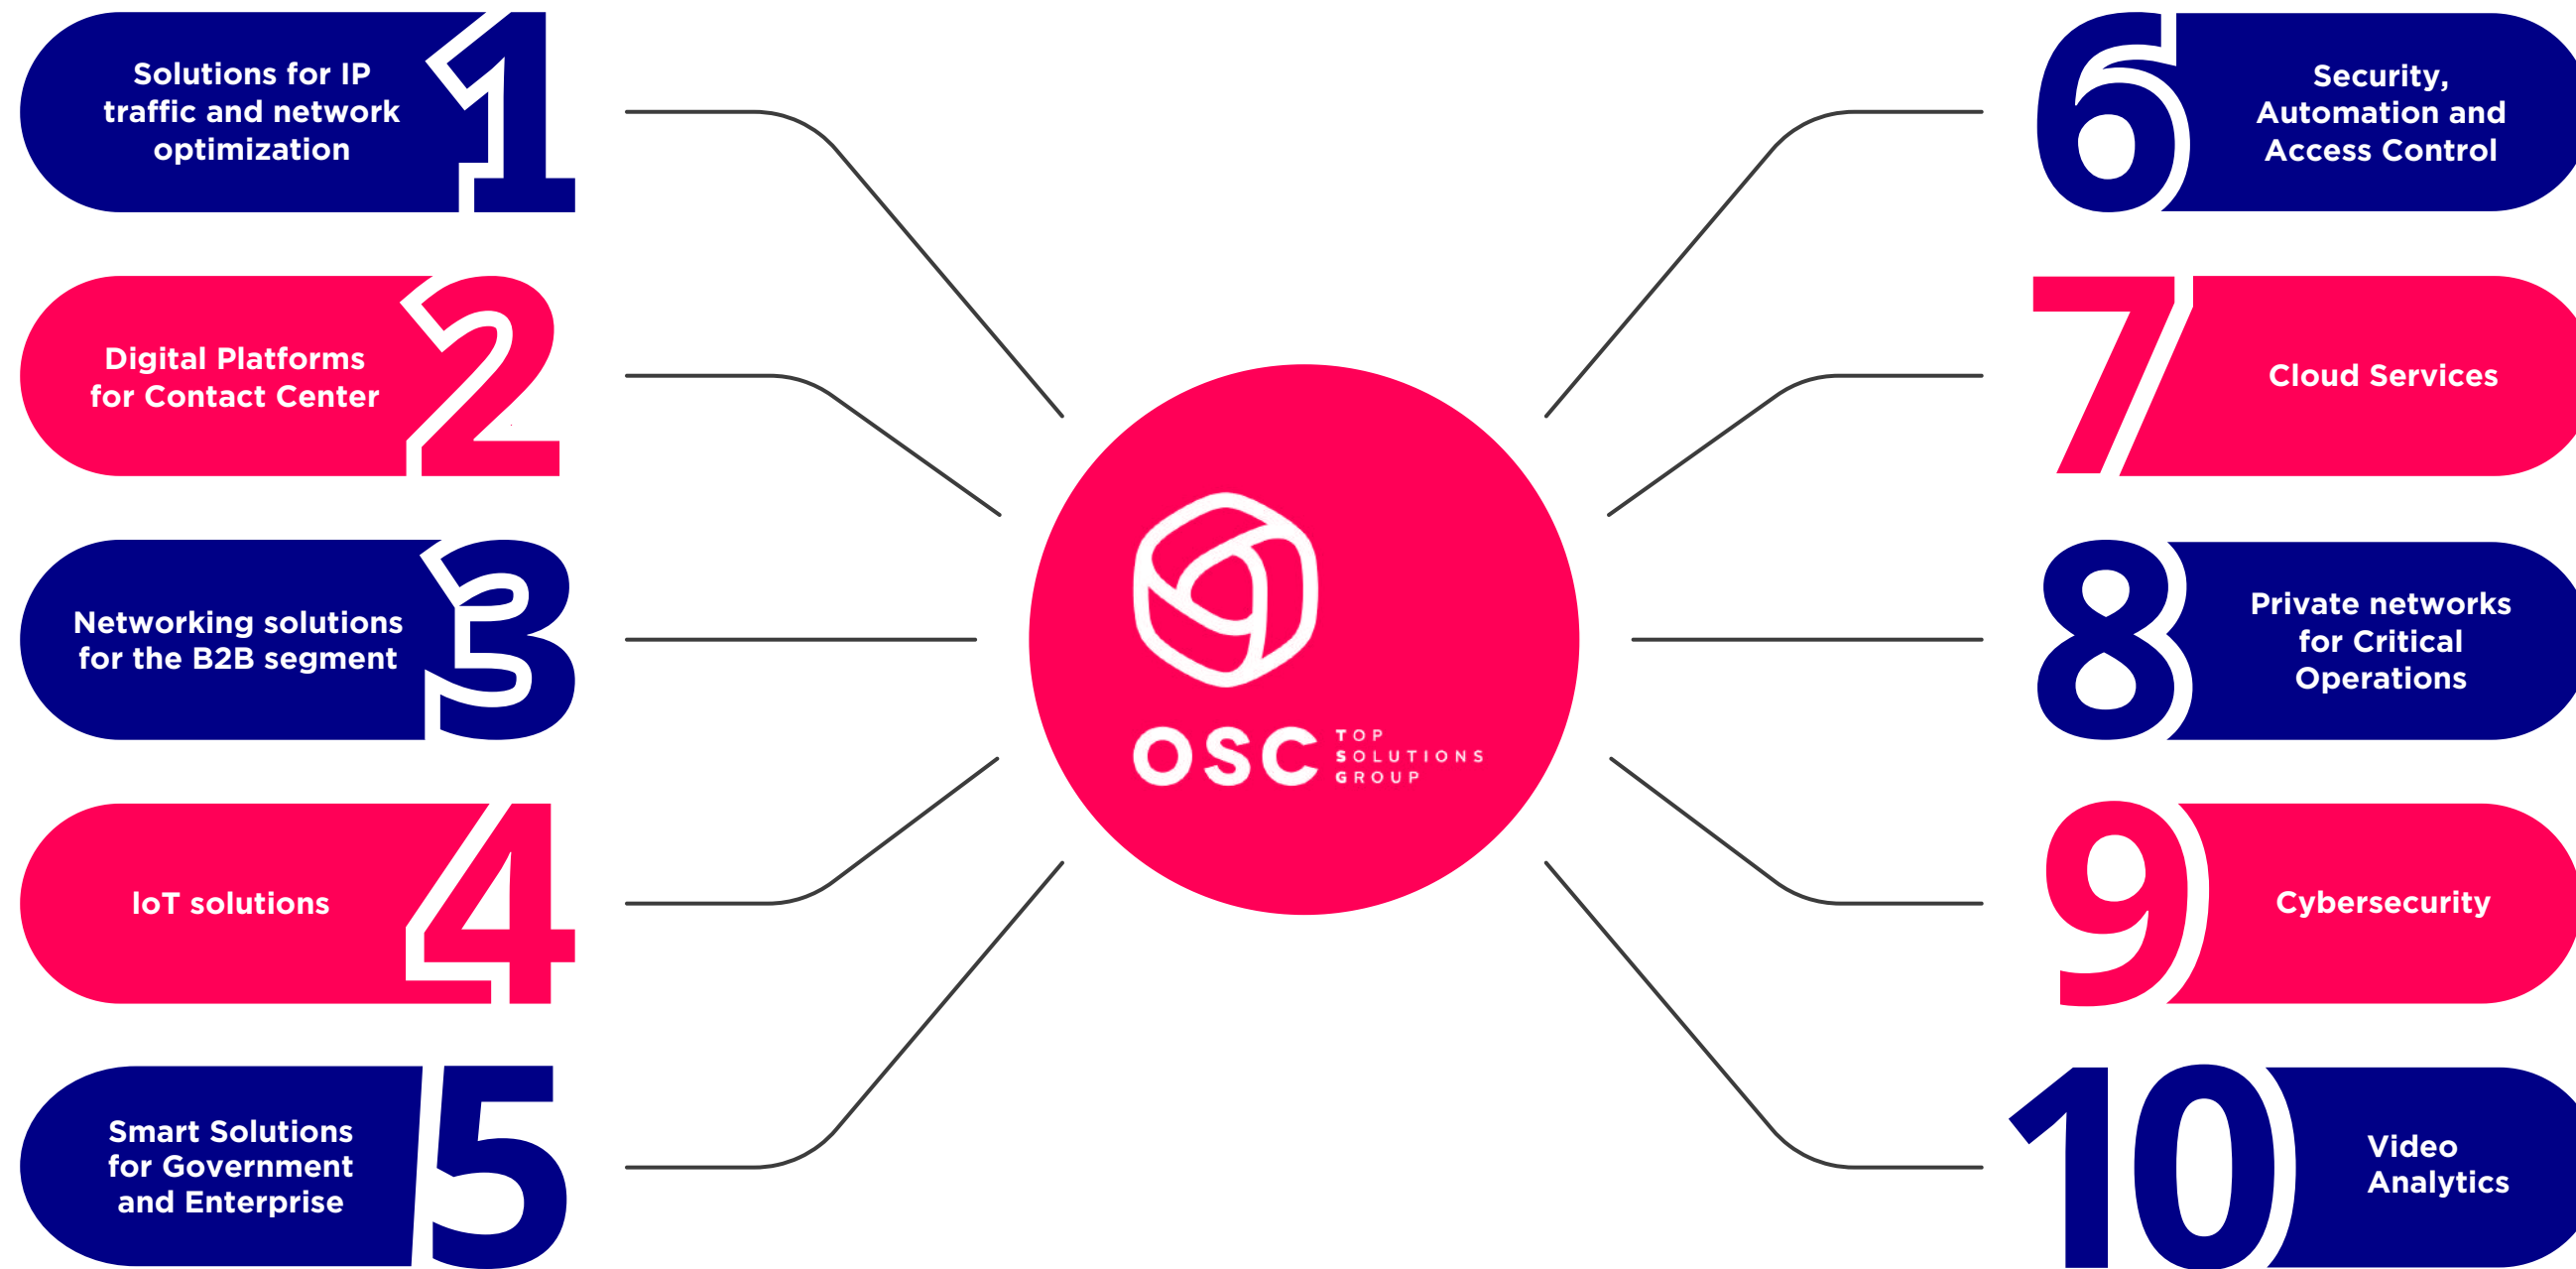

Reverse logistics

We act as a reverse logistics operator in the de-installation of telecommunications equipment, repurchase and re-export.

Smart Solutions

SS

ECOSYSTEM OF ALLIES

Private Wireless Networks

TS

What do we do?

OSC brings **IoT and telecom technologies** to cities interested in adopting **automation and data analytics** to enhance citizens' lives.

Industry 4.0

A highly secure, reliable and high-performance wireless infrastructure that connects all machines, people and processes

Smart Cities

Create value for cities with platforms that ease application setup and updates and make efficient use of data and analytics

Utilities

Help utilities extend communications into the distribution grid to enable integration of distributed renewables, distribution automation, substation automation and advanced metering infrastructure.

OUR SERVICES

1

Aerial Construction

- Fiber assembly
- Dismantling of obsolete networks
- Pole installation and specialized crane rentals

2

Subway Construction

- Trunk main and branch pipelines
- Directional drilling
- Blown fiber optic cabling
- Track testing
- Concrete and asphalt replacement

3

Maintenance of fiber optic networks

- Trunk main and branch pipelines
- Directional drilling
- Blown fiber optic cabling
- Track testing
- Concrete and asphalt replacement

4

Engineering

- Survey of existing infrastructure
- Digitalization of plans
- Design and engineering
- As-Built drawings

5

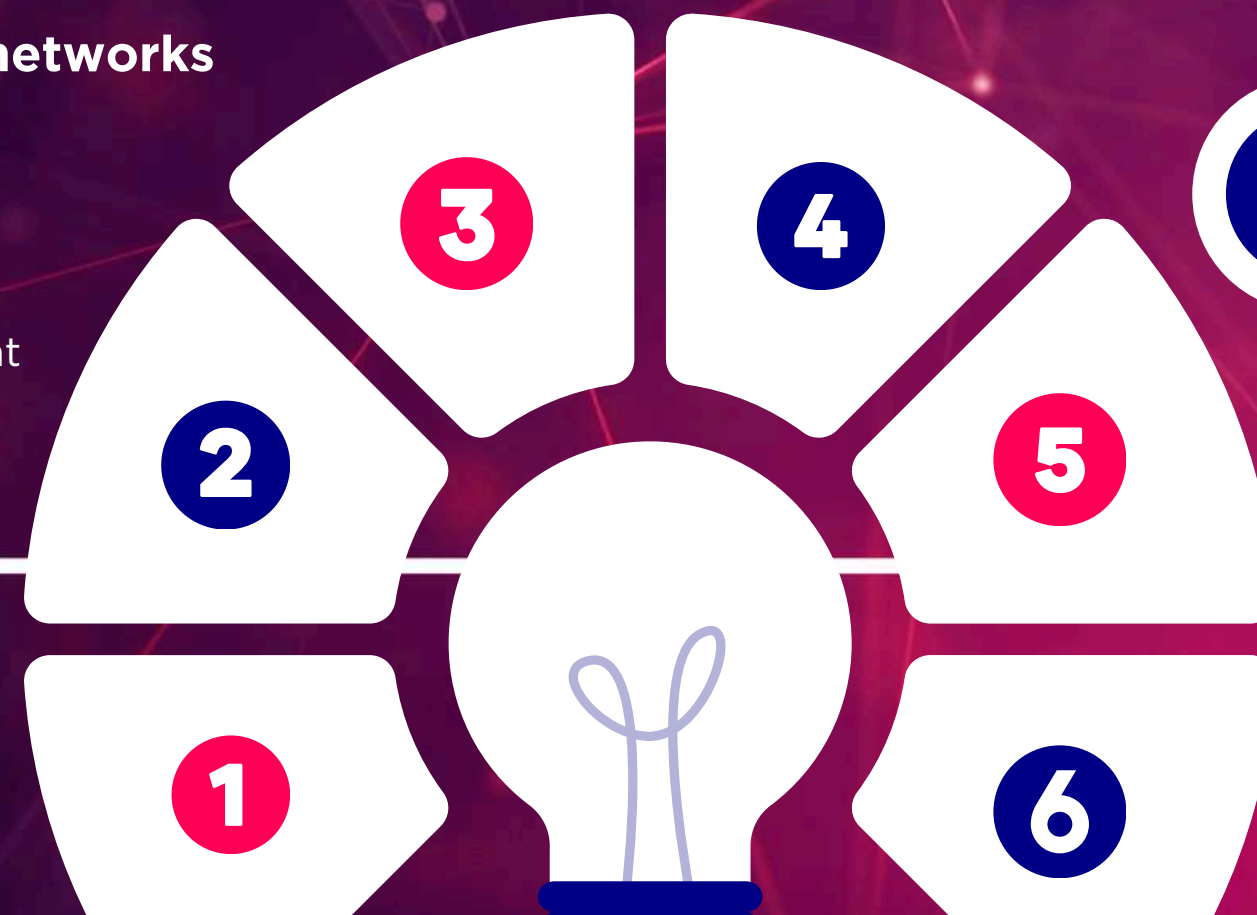

Audit of wired networks

- Preventive maintenance of the infrastructure in general
- Corrective maintenance
- Emergency corrective maintenance

6

Services and testing

- OTDR Testing
- Power measurement tests
- Return Loss Testing (ORL)
- Deliverables Folder

Smart Communities

SS

What do we do?

OSC brings **IoT and telecom technologies** to cities interested in adopting **automation and data analytics** to enhance citizens' lives.

Smart Parking

Detects and manages parking space availability in real-time, helping to optimize on-street parking in cities.

Smart Productivity

Measures environmental conditions to improve workplace health, boost productivity, and ensure compliance with relevant regulations.

Smart Waste

A real-time metering system that enables collection operators to proactively and data-driven determine the routes and frequency of their truck fleet.

AMI

A two-way communication system for collecting detailed metering information across a utility's service area.

Artificial Intelligence

SS

What do we do?

OSC integrates innovative AI-based solutions to streamline **operations and training** for complex technologies and systems.

Network Management

Interprets metadata, analyzes occurrences, and uses these insights to enhance network performance and minimize downtime.

Security Operations

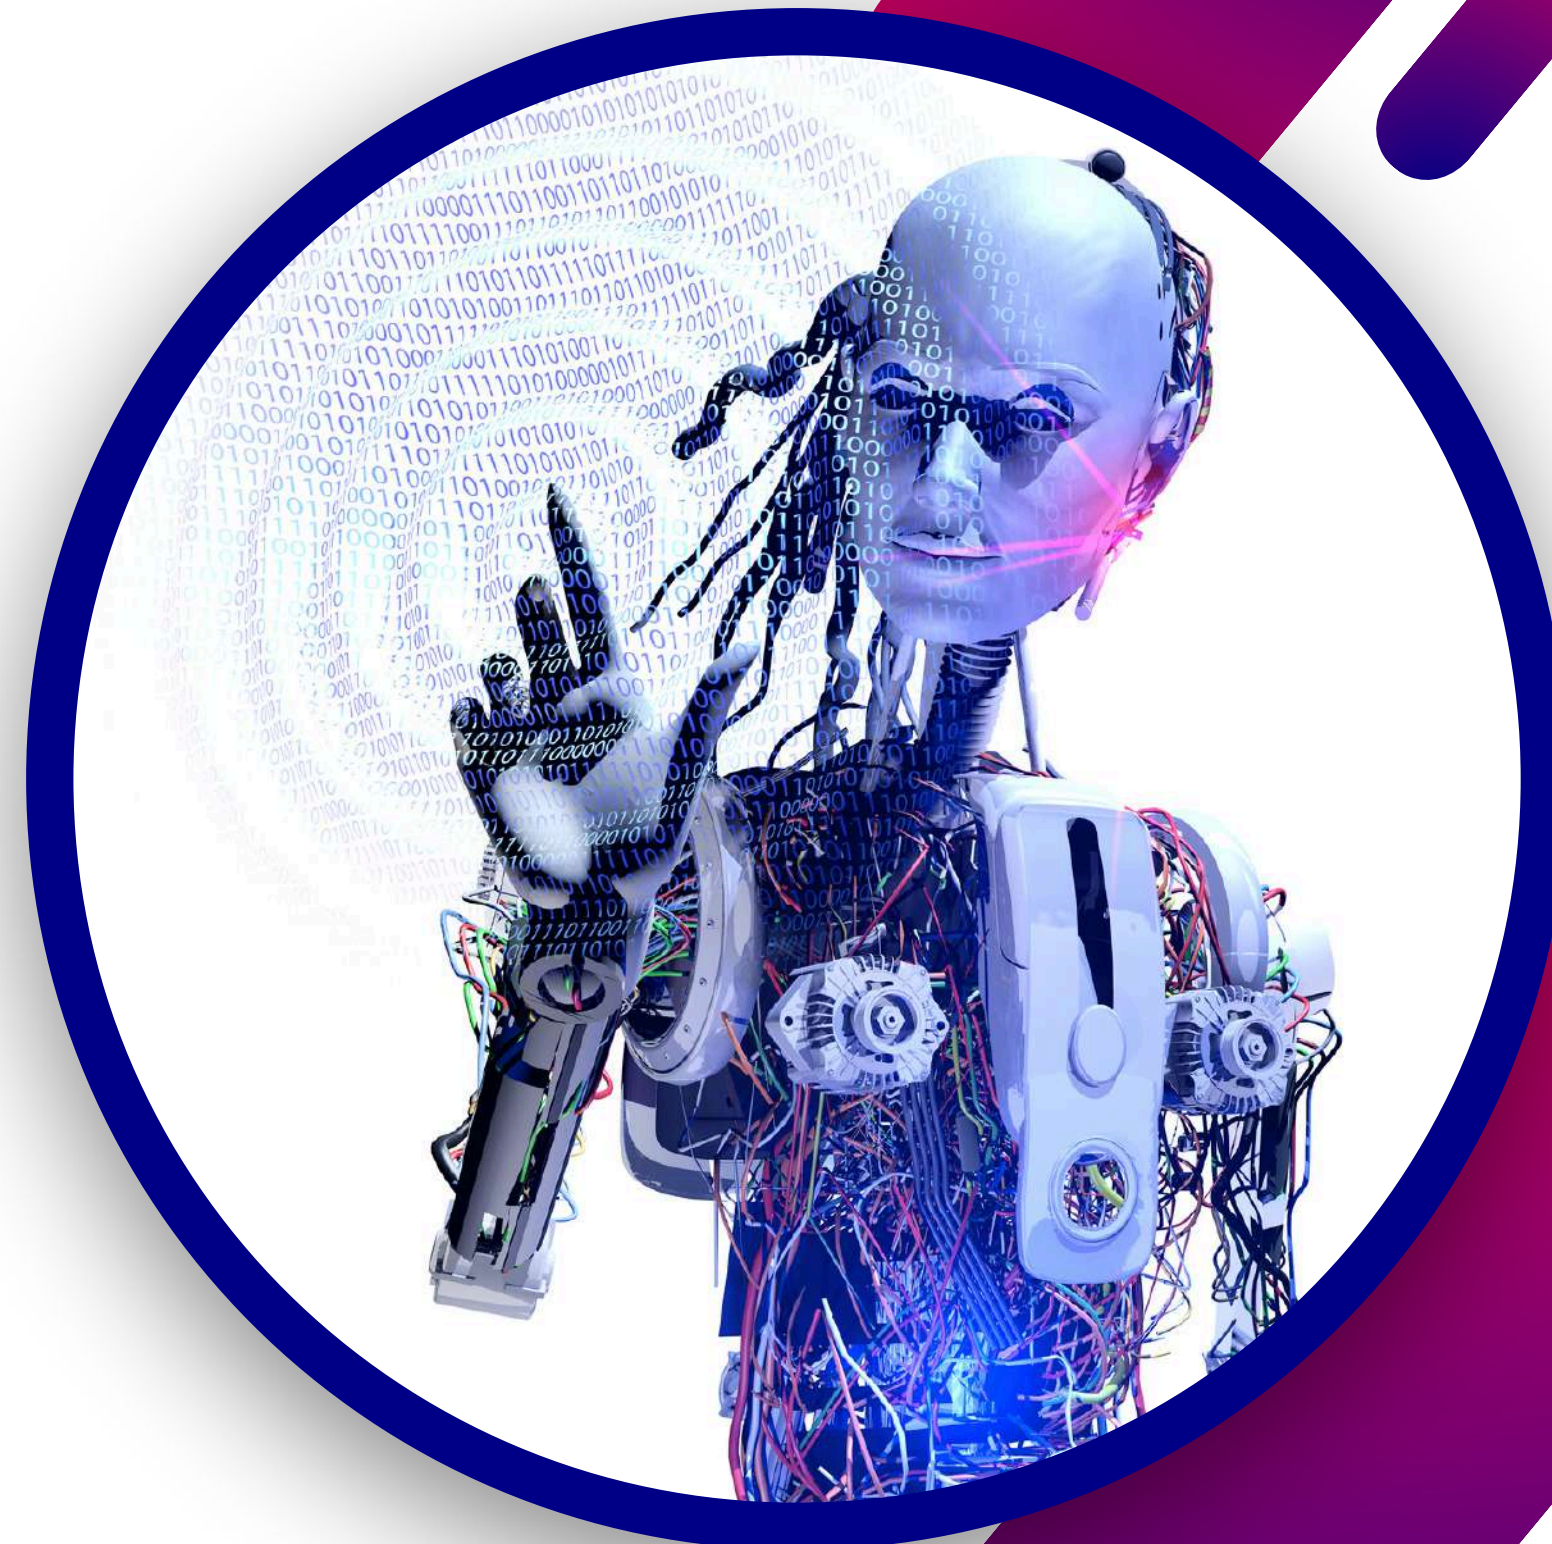

It intentionally measures the network's level of compromise and automates the mitigation and remediation of confirmed incidents.

Digital Twin

It spans the object's lifecycle and uses real-time data sent from sensors on the object to simulate the behavior and monitor operations.

Security Training

It automates employee awareness and evaluates their alert status in an unattended and personalized manner.

Atmospheric Water Generation

SS

What do we do?

OSC **solves water challenges** and help the environment by using a renewable source: water from air.

Commercial

Get rid of bottled water and generate your own water, free of chemicals and in a sustainable way.

Emergencies

Become independent of uncontrolled water sources with generators designed for reinforced durability and portability.

Industrial

Become autonomous and forget about logistics and installations in your premises.

Residencial

With minimal installation effort, communities can access locally produced water just meters from their homes, all powered by renewable energy.
